कृषि एवं खाद्य प्रसंस्करण उद्योग मंत्री SHARAD PAWAR भारत सरकार **MINISTER OF AGRICULTURE &** FOOD PROCESSING INDUSTRIES **GOVERNMENT OF INDIA** D.O. No. 2-17/2013-Policy 0 1 JAN 2014 Please refer to your D.O. letter dated 20th August, 2013 enclosing therewith the draft Agricultural Development Policy of Kerala. Suggestions/comments of this Ministry on the draft Agricultural Development Policy are forwarded herewith for your consideration. With regards, (Sharad Pawar) Shri K.P. Mohanan, Minister for Agriculture. Animal Husbandry, Printing & Stationery. Government of Kerala, Government Secretariat, Thiruvananthapuram-I Office: Room No. 120, Krishi Bhawan, New Delhi-110 001 Tel.: 23383370, 23782691 Fax: 23364129 Resi.: 6, Janpath, New Delhi-110 011 (India) Tel.: 011-23018870, 23018619 Fax: 011-23018609 E-mail: sharadpawar.sp@gmatteRTCULTURE May be transferred to Agrico B) Dept to Continuation of 40 f No. 26346 Agil13 AD obted 21/2/2014

and some of Ministry of Agriculture on the Draft Agricultural Development Policy of Government of Korala

ontent of Policy	
	The Policy has taken care of the potential agricultural a
Chuncant	The Policy has taken care of the potential agricultural components such as land water and soil in an integrated manner for sustainable agriculture in the state of Kerala. The human components viz. HRD, capacity building skill development of farmers in the growing scenario of climate change and watershed management perspectives have been addressed amicably. In the plants, efforts to popularize agricultural mechanization has been indicated clearly in the policy document. Envisioning disasters, crop insurance and credit schemes are also put in place for effective environmental risk cover that can help the farmers, from agricultural research and education viewpoints the document has addressed strengthening of agricultural universities in the State with a focus on emerging areas of disciplines for improving the quality of research. The document also emphasizes on the farmers' need-based research and technology development, thus providing leads to anticipated ICAR Model Act
:	The Policy document now needs an action plan with clearly defined provides, financial provisions and nestitutions in place, to achieve the desired holistic growth in agriculture.
Some	The State Government may consider inclusion of use/ promotion of liquid biosfertifisers, tike A espirithin Azotobactor, Phosphate Solubilising Bacteria (PSB) and Potash Mobin my Bacteria (KMB) in the Cate Policy Aliquid form is superior in total viable count and has two years shelf life in comparison to solid form which is having maximum to provide chall the
Sr No. 28,10 Policy 205	It may discourage the dairy farmers who supply more that 50 litre of milk per day and affect the milk procurement level of the society beace the State Govt, may review the policy in this regard.
Sr. No. 28.15 - Policy No. 210	It may be mentioned that as per provision of Schedule of 2, ESS Regulations 2011, the registered members of dairy cooperative societies which supply upto 500 litres of Milk per day are exempted from registration under Food Safety and Standards Act 2006.
Sr. No. 28 17 Policy 211	Policy does not refer/ provide the details of the specific study recently conducted to justify the proposal for lowering of the standards (%SNF) of cow milk as it may affect the nutritive value of cow milk hence the policy is not supported in this regard.
Sr. No. 28.18 - Policy 212	It may be desirable that the financial assistance for the policy may be do etailed with the 'National Programme of Mid Day Meai in Schools' as a centrally sponsored scheme of the Development of School Education & Literacy under the Ministry of HRD.
Sr. No. 29.5 - 29.8 — Policy 217 — 222	Government of Kerala is giving due importance to the development of poultry sector in the State and the Department support the proposal. However, it may bring to the notice of the State, the contents of the representation from Compound Livestock Feed Manufactures Association of India stating that the State is levying 14.5% has on broiler tive chicken brought into the State which is causing distress to the farmers. In this context, we may request

Sr. No. 35.4 | 35.9 | Policy 271" - 2275

- 6.3 The agriculturally potential land is to be identified and demarcated with the help of modern technologies such as remote sensing, satellite imagery, etc. and a database is to be made.
- 6.4 The purchase of farmlands should be restricted for cultivators and for farming purpose only.
- 6.5 Cultivable wastes should be brought under plough with immediate effect for augmenting the food production.
- 6.8 A wetland restoration programme should be launched in campaign mode.
- 6 H Appropriate legislative mechanism may be evolved for the promotion of 'Rent a land for farming'

the State Government to have a re-look into the point and take steps, as appropriate, to encourage more consumption in general, benefitting both producers and consumers. Further, turnover tax may prove counter-productive [1]. State Government is trying to achieve self-sufficiency and looking into long-term sustainability. Therefore, the State may also relook into this issue and take a stand where all-inclusive growth is encouraged. It is also believed that Kerala is treating entire poultry at par with agriculture activity and not only broiler farming and accordingly consider electric tariff parity for entire poultry activities. To give boost to the poultry sector, the State may actually extend additional concession on tariff.

The draft policy covers most of the focus areas of DADF like promotion of integrated fish farming and intensive aquaculture, reservoir fisheries development and development of fish feed based on locally available material and knowhow. The policy, however, is silent on meeting shortage of quality seed, which is one of the major constraints for increasing fish production in the country and one of the key areas of focus of DADF's policy. DADF has also circulated guidelines for development of seed certification and accreditation system for meting quality seed requirements. The State Government, may incorporate development of hatcheries/ brood banks as key strategy for increase in inland fish production in the State and also setting up of a mechanism for seed certification.

Soil & Land Use Survey of India (SLUSI) of Department of Agriculture & Cooperation (DAC) is conducting Soil Resource Mapping (SRM) and has centers located in all regions of Country. Besides, National Burcau of Soil Science and Land Use Planning (NBSS&LUP), Nagpur, has developed soil fertility maps for different zones. Data generated by SLUSI and NBSS&LUP need to be utilized for deciding land uses, if already done for Kerala.

As per Seventh Schedule of Constitution of India land is State Subject and therefore, it is prerogative of States

It is to be ensured that culturable wasteland, suitable for agriculture is taken up for agriculture.

Ministry of Environment and Forests (M/o E&F) is already implementing a programme namely; Conservation and management of Wetlands in India (Revised on 12.06.2012).

While doing so the social fabric of the state and equity be also kept in mind.

pregramanes. The averament should have the aim of employin information technology to transform the existing system of land records maintenance and thereby ensuring efficient, accurate and transparent delivery mechanism and conflict resolution in ownership of land.	Land Records Modernization Programme (NLRMP). The major aim of this programme is to build the computerized database of land records as well as registration. State may like to make use of that programme for land reforms.
7.8 Rainwater harvesting and aquifer recharge would be given priority for ensuring the stability and supply owater.	conservation measures, DAC have launched Rainfed Area Development Programme (RADP), which could be made use of by the State.
7.9 The micro-irrigation technology is to be popularized in the state with adequate share of state budget.	for enhancing irrigation coverage by improving efficient use of available water. However, any additionality from State budget is welcomed.
7.10 Farm ponds and Thalakkualams needs to be promoted and protected.	
7.16 Irrigation agriculture being the largest water demanding sector, special attention has to be given for creating and sustaining irrigation infrastructure.	Government may make use of
8.6 A cadastral level soil information system is to be launched.	The state of the s
8.7Make every effort to reduce soil	Department of Land Resources, Ministry of Rural Development is implementing a major Integrated Watershed

crosion on watershed basis.

- O There is need to train skilled personnel in field of climate change adaptation and mitigation.
- 9.8 The Government should make focused approach to facilitate the possibility of strategic planning for systematic Disaster Management, as well as for Contingency planning at District, Block and Grama Panchayat levels against all emergencies, proactively (for preparedness, prevention and mitigation) and responsively (for response, relief, repatriation, the whole way to recovery in the full Disaster Cycle).
- 10.1 The watershed development plans are made to improve rural livelihoods and reduce poverty by developing and strengthening community based approach.

Management Programme (IWMP) for prevention of soil erosion and land degradation on watershed approach. Started approach. Started approach.

Department of Agriculture & Cooperation is in process of launching a mission namely; National Mission for Suscainable Agriculture (NMSA), in which training and demonstration for climate change adaptation and mitigation are one of the major components, which would supplement the efforts of State.

Ministry of Home Affairs is mandated for Disaster Management. However, Drought Management Division of DAC has already prepared the District Contingency Plan for mitigating the effects of droughts across the Country.

Community based approach is adopted under Watershed Development Programmes (WDPs) with emphasis on active involvement of community during planning and implementation of watershed programmes.

The Institutional Mechanism should comprise of Crop Weather Watch Group to periodically review parameters of rainfall, water storage position in reservoirs, pests and disease, availability of fertilizers etc. and State Drought Monitoring Centre should review, on a regular basis, parameters of precipitation, availability of water for various purposes, crop contingency plans etc. in line with the guidelines contained in the Manual for Drought Management, 2009 and Crisis Management Plan, 2013 for Drought (National) [available in the website of the Department of Agriculture & Cooperation (agricoop.nic.in) in the link Reports and Publications -> Drought Management] Response.

The Oil Palm Development Programme under ISOPOM is being implemented in the State of Kerala for increasing the area under Oil Palm cultivation and production of Palm Oil. None of the policies of the State Govt. relate to Oil

41
Palm and Oilseeds Development Programme. It is suggested that Oil Palm may be included in the State's Policy including processing product, value addition and marginal farmers to take up farming, handling of the produce with the assistance of the research development and funding agencies are supported. Promotion of Straw reaper to avoid straw burning Use of IT tools and application while distribution of agricultural equipments under subsidy programme. Farmers may be given liberty to select agricultural Machinery of their choice. Promotion of small and compact machinery to target small and marginal farmers. For the efficacy and effective implementation of farm mechanization component, State must engage subject matter specialists (Agricultural Engineering). Demonstrations of improved machinery may be conducted for bringing awareness.

Para 30.14.1

Para 30.8 Policy 226

Post Harvest equipment may be promoted for value addition of crop and to avoid losses. In order to provide seeds to farmers at lower price, the nurseries dealing with non-notified varieties may also be

exempted from Value Added Tax (VAT)in addition to notified varieties preposed by Govt of Kerala.

The use of Biotechnology in Agriculture including Tissue Culture under the Central Sector Scheme on "Development & Strengthening of Infrastructural Facilities for Production and Distribution of Quality Seeds" is in

The aim of this programme is to promote production of elite planting material/ varieties of agricultural crops. horticultural, ornamental plants, fruits, forestry, medicinal and aromatic plants for the farmers, so that elite planting material, which will be free from disease, may be made available by the implementing agency to the farmers which will increase the production and productivity in the country.

The Department of Agriculture & Cooperation considered the proposal of State Agriculture Universities and financial assistance was released for Strengthening/Establishment of Tissue Culture facilities at Kerala Agriculture University, Vellanikkara, Thrissur and another at KAU Vytilla, Cochin for production of tissue culture plantlets of various varieties of Banana and ornamental plant like Orchids.

Besides, if the State Government required more assistance from the Government of India for production of Tissue Culture plantlets on Horticulture Crops, (vegetable crops & fruits crops) which are the major crops of the State, State Government may forward the proposal to Horticulture Commissioner, Government of India, Erishi

Point no. 30.7, Policy 225

The draft scheme for production of disease free vegetable seedlings/saplings through Plug Type Vegetable Project at larger scale "Sub-Mission on Seeds and Planting Material" a component of National Mission on Agricultural Extension and Technology is under consideration for implementation during the remaining three years of 12th plan period i.e., 2014-15 onwards. Point no. 45.5

Draft scheme has already been submitted for approval of Competent Authority Accordingly the cost of the one unit project would be Rs. 2.50 crores for which land requirement would be 0.5 acre. [All the state Department of Agriculture/Horticulture, State Seeds Corporation including Kerala would cover under implementing agency.]

The policies related to Biotechnology and GM Crops are not dealt in detail in Kerala State, however, policy suggests that it may be framed for protecting interests of the farmers who are the guardians of agriculture to feed the millions. The policy also suggests that research has to continue and environmental, biological, economic and social impacts are to be worked out before launching the GM crops for field trial and widespread adoption. The policy initiative is welcomed. It may however be stated that the Genetic Engineering Approval Committee (GEAC) of the Ministry of Environment and Forests is a nodal agency for grant of permission for environmental release of any crop under the Environment Protection Act, 1986 in the country. Bt. Cotton is the only transgenic crop available in the country for commercial cultivation which is not grown in Kerala State.

कृषि एवं किसान कत्याण मंत्री भारत सरकार MINISTER OF AGRICULTURE & FARMERS WELFARE GOVERNMENT किंदिशकी

0 8 228 2017

Dei: Shei Pinarayi Vijayan Jee

The Hon'ble Prime Minister has announced that as we celebrate completion of 75 years of independence in 2022, the income of our farmers should be doubled. The Union Budget 2015-16 and 2016-17 reiterate this vision. Hon'ble Prime Minister has advocated a seven point strategy to achieve this goal. These are:

700

special focus on irrigation with sufficient budget, with the aim of "Per Drop More Frop".

- Provision of quality seeds and nutrients based on soil health of each field.
- iii. Large investments in Warehousing and Cold Chains to prevent post-harvest engineers.
- iv. Promotion of value addition through Food Processing.
- v. Creation of a National Farm Market, removing distortions and e-platform across 507

 Stations.
- vi. Introduction of a New Crop Insurance Scheme to mitigate risks at affordable cost.
- vii. Promotion of ancillary activities like Poultry, Beekeeping and Fisheries.

In order to realize this well articulated goal, the approach needs to be shifted from production to farmer income centeredness. The broad approach towards achieving the vision of Doubling of Farmers' Income over the next six years i.e. 2016-17 to 2022-23, would be to increase the ret income from each unit of farm by reducing the cost of cultivation, increasing per contribute of customing higher market return on his produce, diversifying into more profitable sub-sact respectively and provide post production and marketing intrastructure. For the purpose of achieving the target and later-Ministerial Committee has also been constituted to examine issues relating to doubling of farmers' income by 2022. The Committee is working on an appropriate strategy and languable recommendations.

Contd....2

At our behest, NABARD has already organized six Regional Conferences in the States of Odisha. Assam, Rajasthan, Maharashtra, Karnataka and Uttar Pradesh wherein all stakeholders metading the States and UTs have participated. The Secretary of this Department has also written to this Secretary of your State/UT to work on an appropriate strategy as the States have a primary ride in working towards realization of doubling of farmers' income. You will agree that each States have its own unique strengths which can be utilized for devising a state specific roadmap. The States/UTs have also been requested to share their strategies with the Central Government.

To achieve the target set by the Prime Minister, the cooperation and support of the State Covernment is crucial. I would therefore, request you to share immediately the roadmap/strategies devised for doubling the income of farmers by the year 2022. You may kindly involve a cross section of the society represented by the farmers and their associations, professional organizations that are engaged at different stages of the value chain, scientists, academics, opinion makes and policy makers. This will enable a comprehensive report and once shared with us, we can come out with a national strategy.

I would request you to advise the concerned to pay personal attention to this nationally important task.

With regards,

Yours sincerely

(Radha Mohan Singh)

Shra Finarayi Vijayan, Chief Minister of Kerala, Scaecariat, Thiruvananthapuram- 695001
