Sub:- Application for approval & Letter of Intend (LOI) for setting up of a 'State of the Art' Integrated Multi Feed Manufacturing unit for Ethanol / ENA of 500 KL, IMFL Blending and Bottling unit, Brewery of 1 Million HPLA, Malt unit of 3 KLPD, Winery/ Grape unit of 3 KLPD in the esteemed State of Kerala.

Respected Sir,

We wish to bring the following points for your perusal and approval:-

1. First of all, we take this opportunity in extending our gratitude and sincere appreciation for the cordial industrial climate offered to the industries in Keala off late. This pleasant industrial climate offered, has given us confidence for considering to setup an Ethanol plant under the 'NITI Aayog- Ministry of Petroleum and Natural Gas' initiative for Ethanol blending in India -2020-2025, which provides an indicative target of 20% ethanol blending under the Ethanol Blended Petrol (EBP) program by 2030.
As per the decision of Cabinet Committee on Economic Affairs (CCEA) in its meeting of 21.12.2022, the Government of India aims to advance adoption of 20% blending in gasoline in the Country by 2025. This initiative would help in controlling the emission of carbon monoxide and help to protect environment.
2. The Oasis Group of Companies presently owns 5 'State of the Art' Distilleries and ethanol units spread across the State of Madhya Pradesh, U.P. Punjab and Haryana. The Group would be Commissioning its 7th distillery and ethanol unit at Kota- Rajasthan within a short period, Presently the group's collective production is between 26 to 30 crore litre per annum.
3. We understand Kerala is an Ethanol & ENA deficit state with an annual ethanol requirement of approximately 500 Lakh litres of ethanol as per the Government of India projections for 2024-2025 which has proposed for 20% blending into motor spirit (petrol).
4. Accordingly Oil Marketing Companies (OMCs) invited an E Tender on 15/05/2023 seeking Expression of Interest (EOI) for signing long term off take Agreement with the upcoming dedicated Ethanol Plants in state of Kerala. We are privileged to know that out of 133 applications we are the only one shortlisted for the state of Kerala. We will submit the official communication once we receive it from the OMCs.
5. Sir, going by the above projections of Government of India and after coming to know that presently no ethanol/ENA manufacturing units are existing in the state of Kerala, we are desirous to set up a World Class 500 KL capacity Ethanol cum Multi Feed Distillation and IMFL Bottling, unit, Brewery, Malt plant, Winery and Grape Spirit plant in Kerala, with an investment of approximately 600 crores which would be in the following phase wise.

Phase 1	-IMFL Bottling Unit with 3 Automatic & 3 Semi Automatic Lines With 8 lakh Blending capacity & 16 lakh ENA Storage Capacity, 4 lakh cases finished goods Ware House & 4 lakhs cases Packing Material Storage.
Phase 2	-Ethanol /ENA Unit – 500 KLPD , Power Generation through turbine, DDGS & CO2
Phase 3	-Malt / Winery /Brandy Unit Of 3KLPD each
Phase 4	-Brewery 1 Million HPLA

6. This proposed unit shall be a multi feed plant and therefore, can be run on tapioca (Cassava), Grain (broken /rotten rice/bajra /wheat/corn/maize/Molasses) etc. We shall also be finding the feasibility and sustainability of using bio-mass such as tapioca starch, cashew shell, rice husk (as fuel for boiler) which would help develop the local farmers and their produce, develop employment opportunities both skilled and unskilled, harness carbon-di-oxide, generate dried distillers grain with soluble (DDGS), generate surplus power for sale after fulfilling our captive consumption, implement rain water harvesting in a significant way, help develop ancillary units around the area and above all generate sizeable revenue for the state exchequer, and help improve the economy in and around the unit.
7. Sir, we have identified and is in possession of around 24 acres of land for the purpose , close to the industrial area of Kanjikode (Palakkad) where a number of industries are located. This area is also free from the ecological and environment fragile zones notified by the State and Central Governments.
8. Sir, it is also submitted for your information that this proposed Ethanol/ENA distillation unit would be based on zero discharge technology and would therefore be confirming to all emission norms stipulated by Ministry of Environment and Forest -Government of India. We further, beg to state that the proposed venture would abide by all the stipulated / laid out norms rules and regulations prevailing from time to time, and would be of world standards. We further submit that we have got the consent from the Kerala Water Authority for sufficient water supply and made outside arrangements also for this complete project. Hence there is no exploitation of Ground Water for the execution of this project.
9. Sir, it is first requested to permit us to install and commission the blending and bottling unit , as this would require no Central clearance and also for the fact that we are already a strong IMFL supplies to the KSBC. This would also help contribute to the State Ex-Chequer and immediately help employ the local man power and generate employment opportunities from in and around the area.
10. We are submitting the original application through online/offline with the Circle Inspector of Excise, Palakkad with
 - Challan copy of the fees paid
 - 5 Nos Project Report
 - Proposed Plan of Integrated Project
 - Company's Memorandum of Association
 - Company's Articles of Association
 - Board Resolution
 - Director's Clearance Certificate from Parent Company Location Excise Authorities
 - Land Possession Certificate
 - Land Tax Receipt

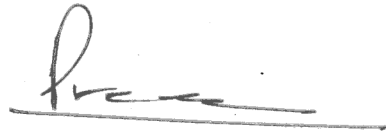

Therefore, we seek your patronage, guidance and approval and kindly Issue a Letter of Intent (LOI) for setting up of a 'State of the Art' integrated Multi Feed Manufacturing unit for Ethanol/ENA of 500 KL, IMFL Blending and Bottling Unit, Brewery of 1 Million HPLA, Malt unit of 3 KLPD, Winery/Grape unit of 3 KLPD in the esteemed State of Kerala, in order to proceed with the negotiations with plant suppliers, consultants and govt agencies.

Thanking You

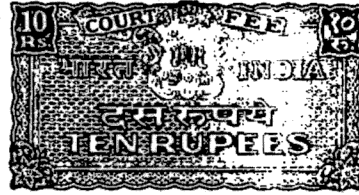

Yours Faithfully
