O R D E R

The State Planning Board, from the two years of experience in decentralised planning, felt the necessity of an efficient system, for the collection and collation of data on plan programmes prepared by local bodies, and regular monitoring and feed back mechanism is essential for ensuring the right planning and effective implementation of projects. Each local body is supposed to be a local self Government, implementing a large number of development programmes individually. Monitoring of development plans of such large magnitude can be accomplished only by establishing a computer network. Such a network will be able to facilitate easy and prompt communication between various local bodies with the State Planning Board for monitoring the plan implementation in local bodies, to whom 35-40% of the State Plan fund is devolved as grant-in-aid for formulating need based local development plans.

2.
